

# FETAC COMPONENT CERTIFICATE IN PROJECT MANAGEMENT

**DURATION**  
**3 days**  
**PDU's**  
**22.5**

*Master the essential skills and tools of Project Management. Complete a project and an assignment as part of this course to demonstrate your skills.*

## Course Overview

This course introduces you to Project Management and provides you with the skills and tools to ensure you can successfully plan, manage and close your projects. Understand how to be proactive in your approach to risk management. Identify mitigation and contingency plans to ensure your project delivers within project constraints. Practice change control and status reporting to ensure your stakeholders expectation are managed.

You will be supported in the preparation of your project and assignment to complete the FETAC certification.

## Who is this course suitable for?

This FETAC certified course is beneficial for those who are new or have just entered project management. The course provides an ideal introduction as a follow-up project and assignment in the workplace is required for certification. This ensures you can practice and apply the tools and techniques in the work environment.
