

Project Management Professional Certification (PMP®)

Course Description

Studies indicate that only one-quarter of all projects world-wide succeed in achieving quality, cost and schedule objectives. With the ever increasing pressure to manage costs and an equally aggressive market space for quality products delivered to scheduled dates; the need for certified project managers is increasing. The Project Management Professional (PMP®) certification is the most widely recognized certification available to Project Managers worldwide. Professionally Certified Project Managers are a benchmark for excellence in terms of performance and productivity in their profession and also bring a repeatable, consistent quality to the projects they manage. This course is geared towards achieving Project Management Professional (PMP®) Certification.

Learning Outcomes

On completion of this course, participants will be able to:

- Apply PMI recognised project management tools, techniques and methods for during the 5 process groups of planning, execution and monitoring and controlling and closing

- Free Access to Velopi's online 800 Question PMP Exam Simulator.

What past participants have said about Velopi's Project Management Professional Certification (PMP®) course

"BiancaMed engaged Seamus in February 2011 to deliver in-house project management training to the entire organisation. The feedback from the participants has been universally positive. Seamus' style and pace was exactly right for our team. He was extremely thorough in ensuring that the material was clear and understood. Importantly, Seamus has been vigilant in following up with me and with our management team to ensure that the lessons, tools and practices learnt through the project management training are implemented into the business. Seamus was extremely generous with his time both before and after the training. I am very happy to recommend Seamus Collins as he is an exceptional business trainer and consultant."

BiancaMed
April 2011

"I attended the Velopi Training Course for PMP® certification. The training was interactive, conducted in a pleasant environment and full of real life examples with a continuous focus on passing the exam. The website run by Velopi to support the exam is second to none; it contains the most similar layout and questions to the real exam. Completing the PMP® course with Velopi is the best preparation possible for passing the exam, I am very glad I did and would recommend anyone to do likewise."

Abbott Vascular
June 2010

"I recently achieved PMP[®] certification. I am happy to recommend Velopi for PMP[®] exam preparation. The Velopi PMP[®] exam preparation course provided solid grounding in all PM knowledge areas while keeping focus on key exam topics. The course also provided a valuable insight into how PMBOK Project Management best practices can be applied in the everyday work environment. Velopi's post course follow support was excellent and the web based exam simulator proved to be very helpful."
